e-Cycle Announces Expansion Plan

Hilliard, Ohio—e-Cycle is pleased to announce that they have chosen Hilliard, Ohio as the site for their expansion plan. The company will relocate to a new facility at the end of September 2009. This decision comes after months of looking at many options in various areas.

Consistent and rapid growth has made this move possible, and also integral to e-Cycle's progress. The Ohio Department of Development recently granted the company tax credits to create 40 jobs over the next three years, which requires additional office space.

e-Cycle utilized Central Ohio vendors for the renovation work, injecting over \$200,000 into the local economy. The state-of-the-art space has been set up to create process flow and a more efficient use of resources.

With an additional 20,000 square feet, the new facility will better serve the purposes of the company. These improvements plus the additional space will allow the company to process over 5 million phones annually.

“We pride ourselves in providing exceptional service to our clients and partners. Our expansion will allow us to continue offering the best data security, asset recovery, and environmental services in the industry,” said Tonia Guy Irion, Vice President of Marketing.

e-Cycle is a full-service wireless recycling company that recycles and resells new and used wireless phones and accessories. e-Cycle works with organizations around the world, in every industry, in the public and private sectors, and of every size, from small municipalities to the Fortune Global 500. e-Cycle helps customers meet the corporate, financial, and environmental challenges of wireless disposal with a comprehensive set of offerings that include: Data Security, Wireless Asset Recovery, Environmentally Compliant Recycling, Inventory and Appraisal, and Logistics Management.
